Pet urine stains & odours? Let biology do the work.

Discover how BioEnzymes Odour Eater products tackle pet urine odours at their source.

Pet accidents happen. Lingering odours don't have to.

Whether it's a puppy learning the ropes, a cat marking its territory or an occasional accident, pet urine can leave stubborn stains and unpleasant odours in carpets, upholstery and other surfaces.

Ordinary cleaners and fragrances may temporarily mask the smell, but BioEnzymes Odour Eater products are designed to tackle the organic material responsible for those odours.

50 BILLION
LIVE BACTERIA PER LITRE

Not just enzymes. Living, enzyme-producing bacteria.

Our concentrated biological formulations use beneficial bacteria that produce enzymes to help break down organic waste and tackle odours at their source.

How does Odour Eater work?

BioEnzymes uses naturally occurring, enzyme-producing bacteria to break down organic matter associated with pet urine and unpleasant odours.

Unlike products that rely on strong fragrances to cover up smells, our biological cleaning process targets the source of the problem, leaving your home cleaner and fresher, naturally.

Breaks down organic matter
Beneficial bacteria and their enzymes digest the organic material in pet urine.

Fragrance Free options
Our dedicated Fragrance Free range contains no added fragrance or colours – ideal for sensitive pets and households.

Safe for your home and pets
Suitable for use on carpets, upholstery and many other surfaces when used as directed.

A natural, long-term solution
Continues working after application to help keep surfaces cleaner and fresher for longer.

How to remove pet urine stains with Odour Eater

A simple 3 step process for cleaner, fresher carpets, upholstery and more.

1 Wet the stained area

Start by thoroughly wetting the stained area with water. You don't need to soak it, just enough to moisten the area to help the product penetrate.

2 Dilute and apply

General cleaning
Dilute 40 ml in 400–500 ml of water.

For strong odours & stubborn stains
Dilute 50 ml of product with 100 ml of warm water.

Mix in a spray bottle and apply evenly to the affected area. Make sure the area is well covered.

3 Let it work

Allow the product to penetrate and work for at least 24 hours. For best results, keep the area covered with a towel or plastic sheet if possible.

As the bacteria and enzymes break down the organic matter, odours and stains will be removed naturally.

Repeat if necessary
For older or severe stains, reapply and allow more time. You may need to repeat the process two or three times for heavily affected areas.

Odour Eater Cats
Concentrated multi purpose enzyme cleaner & odour digester.

Odour Eater Cats Fragrance Free
Concentrated multi purpose enzyme cleaner & odour digester.

Odour Eater Dogs
Concentrated multi purpose enzyme cleaner & odour digester. Citrus scent.

Odour Eater Dogs Fragrance Free
Concentrated multi purpose enzyme cleaner & odour digester.

What to be aware of

Don't mix chemicals

Don't mix Odour Eater with bleach, disinfectants or other chemicals.

Bleach and disinfectants are designed to kill bacteria. This will also kill the beneficial bacteria in Odour Eater, stopping it from working.

For the best results, use Odour Eater on its own and put down other cleaning chemicals for now.

Don't store mixed product

Once you've diluted the concentrate with water, it's best to use it all. Don't store leftover mixed product, as the beneficial bacteria will become less effective over time.

If you need to make more, simply mix a fresh batch when required. The concentrate has a 3-year shelf life when stored correctly (in a cool, dry place, out of direct sunlight).

Your bleach or disinfectant will not work

Your bleach or disinfectant will basically kill the Odour Eater product, rendering it pointless. So, put down the other chemicals for now!

What makes Odour Eater so good?

A natural, effective and versatile solution for pet urine stains and odours.

Environmentally-friendly cleaning

BioEnzymes Odour Eater is a concentrated biological product that can be diluted with water. It offers more cleaning to the bottle than a ready-made cleaner, making it a cost-effective and environmentally friendly choice.

50 billion live bacteria per litre

Our Odour Eater range contains 50 billion live, enzyme-producing bacteria per litre. These beneficial bacteria and their enzymes work to break down the organic material in pet urine stains and odours.

Safe for your home and pets

When used as directed, Odour Eater is safe for use on carpets, upholstery and many other surfaces. It's a pH neutral, non-hazardous and non-corrosive cleaner with no added colours. Our Fragrance Free range is ideal for sensitive pets and households.

Fragrance Free options for sensitive pets and households

We understand that some pets and households don't want added fragrance. Cats in particular can be sensitive to scents, and many pet owners prefer a fragrance free home.

Our dedicated Fragrance Free range contains no added fragrance or colours – just the same powerful, live bacteria and enzyme action to remove stains and odours naturally.

How long does it last? Is it cost-effective?

The concentrated formula goes a long way. For example, a 5 litre bottle, when diluted, can make up to 20 litres of ready-to-use product (depending on the dilution rate and size of the stain). This gives you more cleans per bottle, saving you money and reducing packaging waste.

BioEnzymes
Building on biology®

BioEnzymes
Building on biology®

A cleaner, healthier home for you and your pets.

Natural solutions for a cleaner home, healthier pets and a cleaner environment. ♡

BioEnzymes is an Australian-owned company specialising in concentrated bio-enzymatic products and environmentally friendly, water-based household cleaners. Our innovative formulations harness the power of biology, including 50 billion live, enzyme-producing bacteria per litre in our key biological products, to effectively clean, remove odours and maintain your home — naturally.

Open

Bio-enzymatic drain cleaner & odour digestor

Quickly digests organic matter that causes blockages and odours in drains and sink traps. Keeps areas smelling fresh with a natural, long-lasting biofilm.

- Breaks down fats, grease, proteins and organic waste
- Helps prevent blockages
- Leaves a protective biofilm
- Safe, non-corrosive and septic safe

Maintain

Grease trap, septic & biocycle maintainer

An environmentally friendly, biological booster, grease trap & drain maintainer. Helps keep sinks & drain lines, grease traps, septic systems and biocycle systems clean and free of foul odours and blockages.

- Reduces build-up of organic matter
- Helps prevent costly pump-outs
- Ideal for septic tanks, biocycles and grease traps
- Safe and environmentally friendly

Drain & Septic Pellets

Concentrated biological maintenance

A slow-release pellet for drain lines, septic systems and grease traps. Continuously releases beneficial bacteria to keep your system clean and odour free.

- Long lasting, slow release
- Reduces odours and build-up
- Ideal for home and commercial systems
- Safe and easy to use

Enviro Cleaner

Multi purpose cleaner & broad spectrum sanitiser

A versatile, environmentally friendly cleaner that effectively removes dirt, grease and odours from floors, walls, kitchens, bathrooms and more. Kills mould and mildew.

- Powerful cleaning – totally biodegradable
- Kills mould and mildew
- Fresh, long-lasting results
- Suitable for most surfaces
- Phosphate free and biodegradable
