

BIOCLEAR

Bio-Enzymatic Pond & Dam water clarifier

Environmentally friendly live bacterial product.

BioEnzymes BIOCLEAR is a unique environmentally friendly bio-enzymatic formulation that replaces hazardous traditional products used to clear pond & dam water. It has been specifically formulated to attack the organic matter that algae feeds on to grow.

Specially selected bacteria release enzymes that liquefy & then literally digest the organic matter. The only by-products of this process are water & CO₂.

Bio-enzymatic action has been nature's way of degrading waste since the earth was formed, but until now enzymes did not act fast enough. Now with advanced chemistry, this proprietary formulation acts immediately to peptize & break up organic matter and clear pond & dam water.

Unlike chemical products, **BIOCLEAR** will not burn the flesh or ruin clothing, and is totally safe for all aquatic life and fish.

Benefits

- **SAFE TO USE** - Contains no corrosive poisonous chemicals colors or fragrances. Clears and cleans water naturally and quickly.
- **SAFER FOR FISH & AQUATIC LIFE** - Will not harm aquatic life or your fish or other flora and fauna.

- **SAFER IF SPILLED OR SPLASHED** - Contains no acids or caustics to harm aquatic life
- **CLEAN AIR FORMULA** - Contains no VOC's to pollute the atmosphere.
- **SAFER FOR DRINKING WATER** - Contains no chlorinated solvents to contaminate ground water.
- **WORKS FASTER** than other bio-enzymatic digestors because it liquefies organic matter faster.
- **WORKS NATURE'S WAY** - Since its beginning, the earth has been cleansed of waste by bacteria & the enzymes they release. **BIOCLEAR** functions the same way, but with specially selected bacteria it works faster.

BIOCLEAR Bio-Enzymatic Pond & Dam water clarifier

BIOCLEAR is a liquid Bio-Enzymatic Pond & Dam water clarifier that works nature's way, but faster, to literally digest organic matter that algae feeds on by using bio-enzymatic technology.

Uses

For cleaning and clearing pond and dam water before use of BioEnzymes BIOMAINTEIN pond and dam water maintainer.

Directions

BIOCLEAR IS BEST USED THROUGH AUTOMATIC DOSING MACHINE BUT IS NOT TOTALLY NECESSARY

THIS IS A CONCENTRATED PRODUCT : 100 Mil CFU/ml

STORE IN A COOL DARK SPOT.

SHAKE WELL BEFORE USE.

DIRECTIONS:

Mix the required amount of BIOCLEAR with 1lt to 5lt of pond water and slowly add to the pond in an area where the water is circulating.

If the pond is a still pond agitate and airate the water as best as possible for several minutes after application.

30ml Treats up to 2000 Litres

60ml Treats up to 4000 Litres

100ml Treats up to 8000 Litres

200ml Treats up to 15000 Litres

Apply BIOCLEAR every two weeks for best results.

For initial treatment of a new pond, double the application to seed your pond filter and clear the water quickly.

Specifications

NUMBER OF BACTERIA STRAINS	7
TYPES OF STRAINS	enzyme producing bacteria
SALMONELLA CONTENT	none
PH OF CONCENTRA TE	nominally neutral
APPEARANCE	clear
ODOUR OF LIQUID	None
