

Home Fresh

Whole-home probiotic odour treatment system
For carpets, fabrics, bedding, mattresses, cars,
walls, litter areas, turf & outdoor pet environments.

Product Overview

HomeFresh is a highly concentrated probiotic odour treatment system designed to break down and digest the organic matter responsible for stubborn household, dog and cat odours.

Unlike products that simply mask smells, Home Fresh uses live probiotic bacteria that release enzymes to naturally digest and eliminate odour-causing organic matter at the source.

HomeFresh helps treat odours associated with :

- urine
- vomit
- faeces
- body oils
- pet odours
- organic build-up
- dust mite and organic dander residues.

Billions of specially selected probiotic bacteria lie dormant in every litre of Home Fresh until activated by water and contact with organic matter.

Once activated, the probiotics begin breaking down and consuming the source of odours naturally.

HomeFresh contains:

- no added fragrance
- no added colours
- no harsh masking agents

Perfect for whole-home odour treatment across homes, dog and cat environments, vehicles and outdoor spaces.

ELIMINATES ODOURS AT THE SOURCE

Breaks down and digests the organic matter causing odours instead of simply covering them up.

LIVE PROBIOTIC TECHNOLOGY

Billions of live bacteria continue working after application while surfaces remain damp.

WHOLE-HOME ODOUR TREATMENT

Ideal for: Carpets, lounges, bedding, mattresses, curtains, rugs, walls, car interiors, pet bedding
·litter areas, shoes, hard floors,

IDEAL FOR TURF & OUTDOOR AREAS

Excellent for: artificial grass, natural turf, kennels, outdoor pet areas, concrete, pathways.

No added fragrances or surfactants makes HomeFresh especially suitable for grass and outdoor odour treatment.

SAFE FOR REGULAR USE

Environmentally friendly and suitable for regular household odour treatment.

SEPTIC & BIOCYCLE SAFE

Contains beneficial bacteria that are safe for septic and biocycle systems.

LONG SHELF LIFE

Bacteria remain dormant until activated by water and organic matter.

TOTALLY BIODEGRADABLE

Natural bio-enzymatic action leaves no harmful residues.

HomeFresh is suitable for:

- dog and cat odours
- urine contamination
- mattresses
- lounges & upholstery
- carpets & rugs
- bedding
- curtains
- shoes
- car interiors
- pet bedding
- litter areas
- around litter trays
- artificial turf
- grass & outdoor pet areas
- concrete & pathways
- kennels & runs
- walls & hard surfaces
- general organic odour build-up

Directions

GENERAL HOUSEHOLD TREATMENT

Dilute HomeFresh approximately:

1 part HomeFresh to 4 parts warm water

Apply using:

- trigger sprayer
- spray bottle
- mop
- pump sprayer
- watering can

Allow treated areas to dry naturally.

Warm water helps activate the probiotics faster.

STRONG ODOURS & PET ACCIDENTS

For urine contamination, recurring odours and deeply affected areas:

- outdoor pet areas
- concrete surfaces

Repeat treatment as required for persistent odours.

Specifications

Microorganisms per gallon.	100 billion
Number of bio-strains.	7
Type strains.	enzyme producing bacteria
Salmonella content.	none
pH concentrate.	7.0 +/- 1.0
Optimum pH matter treated.	5-12
Appearance.	cloudy liquid
Odor counter-actant.	none
Surfactant biodegradability.	rapid and complete
